Buds remain tight and attractive until quite tall. Plantings to date show more rust resistance than regular Washington.

No. 1, ONE YEAR ROOTS: Doz. \$1.45; 50 roots \$3.55; 100 roots \$6.10 prepaid; 500 roots \$17.60; 1,000 roots \$34.10, not prepaid.

Tendergreen was developed over 25 years ago. Since that time many new varieties have been offered only to fade out of the picture. We still believe Tendergreen to be the best "garden fresh" and canning variety.

GREEN BUSH SNAP BEANS

Vitamins A b₁ C b₂

Pkt. will plant 20 ft. row; a pound 150 ft.

★10 TENDERGREEN: 53 days. We believe that the long, round, high quality pod of Tendergreen still keep it at the top of the list as a green bush bean for the table, canning and freezing. Pkt. 25¢; 1/2 lb. 60¢; 1 lb. 90¢; 2 lbs. \$1.75; 5 lbs. \$2.60; 15 lbs. \$6.40; 50 lbs. \$19.10; 100 lbs. \$34.65.

8 SLENDERGREEN: 54 days. Slendergreen is similar to Tendergreen in color, however, the pods are slimmer and much smoother making them especially attractive. Pkt. 25¢; 1/2 lb. 65¢; 1 lb. 95¢; 2 lbs. \$1.85; 5 lbs. \$2.75; 15 lbs. \$6.90; 50 lbs. \$20.70; 100 lbs. \$36.75.

Pods are stringless, brittle, with little fiber and have a dark green skin and interior color. Pkt. 25¢; 1/2 lb. 75¢; 1 lb. \$1.10; 2 lbs. \$2.05; 5 lbs. \$3.25; 15 lbs. \$8.40; 50 lbs. \$22.05; 100 lbs. \$39.90.

YELLOW BUSH SNAP BEANS

Vitamins a b₁ C b₂

Pkt. will plant 20 ft. row

★24 PENCIL POD BLACK WAX: 56 days. In our opinion Pencil Pod is still the best wax bean for home gardeners to grow. The round pods have a clear rich yellow color, are firm and solid like pencils, stringless, brittle, free of fibre, and outstanding in flavor and good eating quality. Fine for canning and freezing. Pkt. 25¢; 1/2 lb. 60¢; 1 lb. 90¢; 2 lbs. \$1.75; 5 lbs. \$2.75; 15 lbs. \$6.90; 50 lbs. \$21.00; 100 lbs. \$37.80.

POLE BEANS

A woven wire fence makes an ideal support for pole beans, or you can use poles. Plant 5 or 6 beans around each pole and thin to 3.

58 KING OF THE GARDEN LIMA: 88 days. We have replaced Early Leviathan pole lima with King of the Garden because it is more productive, more consistent in producing a good crop, and it is equally fine in quality. Vines vigorous, strong climbers, 8 to 10 ft. Pods are 5 to 6 in. long, flat and smooth with 4 to 5 large, flat, pale green seeds per pod. Pkt. 25¢; 1/2 lb. 60¢; 1 lb. 90¢; 2 lbs. \$1.75; 5 lbs. \$2.95; 15 lbs. \$7.40; 50 lbs. \$22.60; 100 lbs. \$40.95.

54 BLUE LAKE FM-1 SNAP BEAN: 58 days. A new superior stringless strain of the famous Blue Lake pole bean. Pods are smooth, round, dark, 5 1/2 in. long and are borne over a long period from base to top of plant. Pkt. 25¢; 1/2 lb. 65¢; 1 lb. 95¢; 2 lbs. \$1.85; 5 lbs. \$3.05; 15 lbs. \$8.35; 50 lbs. \$25.20; 100 lbs. \$46.20.

★56 SCOTIA SNAP BEAN: 72 days. Probably Blue Lake FM-1 will, under most conditions, out yield Scotia but Scotia has a "buttery" flavor that we have never found in any other snap bean. Scotia pole beans will give you more beans over a longer season than the bush varieties. Pkt. 25¢; 1/2 lb. 50¢; 1 lb. 85¢; 2 lbs. \$1.60; 5 lbs. \$2.55; 15 lbs. \$6.15.

In our 1958 Catalog we dropped Scotia in favor of Blue Lake FM-1. This year we are listing both varieties but will grow Scotia in our own garden. Scotia has that distinctive flavor that makes them so good.

★174 NEW ROYAL PURPLE HEAD: 73 days. To us an outstanding home garden variety because of its superior eating and freezing quality. 171 SNOWBALL PERFECTED STRAIN: 60-65 days. The standard variety for the Northeast. This strain is probably planted more widely than any other. 175 SENECA SNOWBALL: 58 days. Seneca Snowball is a new sure-heading strain maturing a little earlier and more evenly than Perfected Strain of Snowball. The curds are snow white, deep, tight and well-formed with good leaf protection.

★178 CAULIFLOWER BLEND: The home gardener and commercial grower with a small acreage needs cauliflower over a longer season than is possible with our new uniform maturing varieties. We are offering for the first time a blend of standard varieties that will, we believe, give the grower the longer harvesting season.

176 SENECA SNOWBALL "B" STRAIN: 58 days. A new selection of this very popular cauliflower. Even more uniform giving a larger percentage of the heads at a single cutting. The heads are large, white, uniform size with good leaf coverage. We recommend that commercial growers try Snowball "B" Strain this coming year.

NEW: An early market corn growing 4½ ft. tall, few tillers-erect growth. **Black green foliage and husk color.** Ears medium large but cylindrical, with excellent ear leaves. 12-14 rows of narrow tasty kernels, tips nicely filled. **Extremely cold resistant**, will emerge and grow when conditions are tough.

Seneca Daybreak is **very cold resistant** with **exceptionally good seedling vigor**. Grows about 5 ft. tall, producing a 7", 12 rowed ear with medium narrow golden kernels. Snapped ears are cylindrical with good flags and are very attractive on the market. Quality is good, but not equal to Seneca 60.

Seneca Daybreak is a money maker for the commercial market gardener looking for that extra dollar from the first corn on the market. Not wilt Resistant. 2 lbs. \$2.15; 5 lbs. \$3.70; 10 lbs. \$6.70; 25-100 lbs. 62¢; 100 lbs. or more 58¢ per lb.

It produces a 5½ ft. stalk with tall erect tillers. Ears medium long and cylindrical with 12 rows of deep yellow kernels.

The snapped ear of Seneca Golden has excellent market appearance and when harvested at optimum maturity is most delicious.

SENECA SUNBEAM, a new early hybrid for the Commercial Grower. We have thoroughly tested Seneca Sunbeam each of the past four years, and have each year found it to be superior in yield and quality to hybrids of the same season. Suggest you get your order in early, seed supply is limited.

HOW TO FREEZE CORN ON THE COB

To successfully freeze sweet corn on the cob, a variety with a small cob gives best results. We suggest using Seneca Chief. Ears should be blanched in boiling water for 6 minutes and cooled immediately in ice water. Ears can then be placed in cellophane bags and placed in the freezer.

To prepare corn for table use, remove it from the cellophane bags, place in a shallow tin and heat in oven until the ears are thoroughly warmed through to the center of the cob.

MARKET SWEET CORN HYBRIDS

Seneca Carmelcross, one of the most popular mid-season hybrids, is a real improvement in both yield and appearance, both of great importance to the commercial grower.

208 SENECA CARMELCROSS (White Silk): 75 days. Our new improved strain of Carmelcross has now been converted to white interior silk. Our strain of this hybrid is generally two days later than standard stocks—it is taller, sturdier and yields significantly more ears. Ears are large, 8" long, with 14-16 rows of narrow and tender kernels.

Carmelcross is a rugged well adapted mid-season hybrid and our Seneca Carmelcross gives you all this plus more rows, narrow kernels and white silk with a greater degree of wilt resistance. 5 lbs. \$3.85; 10 lbs. \$7.00; 25-100 lbs. 65¢; 100 lbs. or more 61¢ per lb.

224 SENECA SUPERMARKET: 88 days. An exceptionally uniform hybrid that is heat and drought resistant and also very resistant to wilt.

The ability of this hybrid to withstand adverse growing conditions has made it a favorite with market growers. Plants are dark green, strong and erect with few tillers. The cylindrical 8" ears with 12-14 rows have good husk coverage and flag leaves. Tips are blunt and completely filled with medium golden kernels.

Seneca Supermarket is easy snapping and the blunt tips make it easy for pickers to judge maturity. Seneca Supermarket is being grown successfully in many market areas and its uniformity and type is filling the demand of critical buyers. 5 lbs. \$4.05; 10 lbs. \$7.40; 25-100 lbs. 69¢; 100 lbs. or more 65¢ per lb.

Use the Special Corn Collection as gifts to friends. Wonderful corn, best I have ever tasted.

MARKET HYBRIDS CONTINUED

226 SENECA WARPATH: 89 days. New. We are introducing an outstanding new hybrid which growers have been enthused about in the three years it has been in extensive trials under the number Exp. 3. It is a superior Security-type in ear appearance with dark green husks, more attractive flag or streamer leaves and in number of marketable ears. Ears are $7\frac{1}{2}$ in. long with 14-16 rows of small, narrow, fine grained kernels well-filled to the tips. Seneca Warpath is potentially a double-eared hybrid, uniform in length and size, when grown under high fertility or wide spacing—both ears are ready to pick at the same time. Plants grow 7-8 ft. with erect strong stalks having few suckers. 5 lbs. \$4.05; 10 lbs. \$7.40; 25-100 lbs. 69¢; 100 lbs. or more 65¢ per lb.

ALL CORN SEED IS TREATED

All our sweet corn seed is treated with a fungicide and an insecticide to protect the seed from wire worms, seed corn maggot and from rotting in the ground. Permits earlier planting.

Probably no commercial sweet corn hybrid has ever become so popular in so short a time as has Seneca Wampum. Catalogued in 1958 for the first time. Indications now are that Seneca Wampum will, in 1959 be one of the most popular hybrids in the larger shipping areas.

227 SENECA WAMPUM: A sister hybrid to Seneca Warpath with the same tall vigorous 7-8 ft. plant and uniform double earing. The ear of Seneca Wampum is a little more cylindrical and the husk and flag leaves are darker green and more glossy. Where *Helminthosporium* is present Seneca Wampum carries greater resistance to this serious corn leaf disease.

Seneca Wampum will give an attractive five dozen pack. If Seneca Warpath has produced too large an ear under your conditions, Seneca Wampum will be preferred.

Ears 8" long with 14-16 rows of small narrow kernels and well filled ears.

Seneca Wampum gives top yields and a fancy pack, it holds well in transit and is preferred by the buyer. 5 lbs. \$3.80; 10 lbs. \$6.90; 25-100 lbs. 64¢. 100 lbs. or more 60¢ per lb.

Everyone here says your Seneca Chief is the best, sweetest and tenderest corn they ever ate. I also plant your flower seeds in Florida and they really grow any place.

We never list a new vegetable variety unless we have personally tested it and feel that it is a quality variety. 1958 was only a fair melon year in the Northeast, too wet and too cold. Even under these conditions, Supermarket produced 100% high quality fruits, by far the best variety in our trials. We highly recommend Supermarket.

327 SUPERMARKET F₁ HYBRID: 86 days. A new high quality disease resistant hybrid melon for the commercial grower and home gardener. Supermarket melons are oval averaging 7" long by 6" in diameter. Tough rind, heavy netting and oval shape holds the melon firm with practically no cracking at blossom end. Flesh deep orange yellow, deliciously sweet with a slight musky flavor. Seed cavity small. Supermarket is resistant to downy mildew and fusarium wilt, probably our most serious melon disease. 50 seeds 75¢; 100 seeds \$1.25; 300 seeds \$3.00; ½ oz. \$4.00; oz. \$7.00; ¼ lb. \$25.00.

SPECIAL SELECTED MUSKMELON SEED

We have a limited amount of seed of Seneca Delicious, Seneca Bender and Iroquois taken from individual melons that were picked for special trueness to type, thickness, quality and flavor of flesh. We recommend this seed to commercial growers who have quality markets.

WINTER SQUASH

Vitamins A b₁ c b₂ Pkt. will plant 6 hills, an ounce 25 hills

Buttercup, we think, is the best of all Winter Squashes. Unfortunately it does not keep well after January 1st. We harvest Buttercup just before frost, bake it, pack the cooked squash in containers and put it in the freezer for winter use.

★425 **SENECA BUTTERCUP**: 110 days. This is our favorite. It is a distinct, outstanding variety noted for its dryness, excellent flavor and quality. Fruits are turban-shaped, 6 to 8 inches in diameter, slightly ribbed, deep dull green faintly striped and flecked with dull gray. Flesh is deep golden orange, smooth in texture and entirely free of stringiness. Just the right size for the family. Buttercup is excellent for freezing too. Pkt. 25¢; 1/2 oz. 45¢; oz. 65¢; 1/4 lb. \$1.60; lb. \$4.20; 5 lbs. or more \$3.95 per lb.

436 **GOLDEN HUBBARD**: 100 days. Similar to Green Hubbard, but earlier, smaller, and more prolific. Fruits moderately warted, orange-red; flesh deep orange and dry. Pkt. 25¢; 1/2 oz. 45¢; oz. 65¢; 1/4 lb. \$1.60; lb. \$4.20; 5 lbs. or more \$3.95 per lb.

429 **GREEN DELICIOUS**: 103 days. This variety has long been a favorite with home and market gardeners; one of the best of the smaller high quality squash. Fruits are broad top-shaped, commonly 7 to 8 inches long. Skin is very dark green, fairly smooth. Rind is thin but hard. Flesh is extremely thick, bright yellow, fine grained and dry, without fibre, and of highest quality. Pkt. 25¢; 1/2 oz. 35¢; oz. 50¢; 1/4 lb. \$1.05; lb. \$3.00; 5 lbs. or more \$2.75 per lb.

★431 **QUALITY**: 103 days. Attractive dark green heart-shaped fruits have thick, deep orange flesh that is fine grained, dry, without fibre. Fruits just the right size, 5 to 10 lbs. Popular with both home and market gardeners. Pkt. 20¢; 1/2 oz. 35¢; oz. 45¢; 1/4 lb. 95¢; lb. \$2.50; 5 lbs. or more \$2.25 per lb.

Seneca Chief is the best sweet corn in the World.

Harpursville, N. Y.

423 **ROYAL ACORN** or **LARGE TABLE QUEEN**: 90 days. Selected out of Table Queen for uniformly larger fruits and now the favorite small individual squash. The flesh is thick and excellent for baking. Noted for big yields and is an excellent keeper. Pkt. 25¢; 1/2 oz. 40¢; oz. 60¢; 1/4 lb. 90¢; lb. \$2.50; 5 lbs. or more \$2.25 per lb.

433 **BLUE HUBBARD** (Eastern grown): 105 days. Our strain of Blue Hubbard we believe is more uniform in type and of better quality than other New England type strains. Squash are large, averaging 30 lbs. in weight, long, pointed at both ends, slightly ridged with a very hard blue-gray rind and small seed cavity. Flesh yellow-orange, thick and of excellent quality. One of the best keepers and fine for freezing. Pkt. 25¢; 1/2 oz. 50¢; oz. 75¢; 1/4 lb. \$1.85; lb. \$5.25; 5 lbs. or more \$5.00 per lb.

Butternut (do not confuse with Buttercup) is probably the most popular Winter Squash grown. Butternut comes in family sizes, keeps well and is good quality.

★426 **BUTTERNUT**: 100 days. More popular with both home and market gardeners every year because it is just the right size for serving the average family; it is easy to peel and prepare for the table; it has a distinctive flavor and high quality; and it is the only variety that is not attacked by squash vine borers. Our Butternut is an extremely uniform strain producing fruits 7 to 9 inches long with a neck about 4 inches in diameter which is solid flesh. The seed cavity is small and is located in the lower bowl-shaped end; skin color is a light creamy brown. The flesh is yellow, fine grained, dry, of good quality and is a good keeper. Pkt. 25¢; 1/2 oz. 50¢; oz. 75¢; 1/4 lb. \$1.60; lb. \$4.50; 5 lbs. or more \$4.25 per lb.

I planted just a quarter's worth of your Hybrid Summer Squash last season and never in all my gardening experience have I seen as many squashes as these few hills produced.

EARLY VARIETIES

471 FIREBALL: 65 days. A first early variety that has become very popular for the home garden and local markets. The plant is small. To secure maximum yields the plants should be set as close as 1 to 1½ ft. in the row. The fruit is round, medium size and produced in great abundance. Truly a valuable addition to our list of tomato varieties. Pkt. 25¢; ½ oz. \$1.10; oz. \$1.90; ¼ lb. \$6.00; lb. \$20.00.

451 VALIANT: 65 days. Popular early variety because of its large size, extra earliness and its ability to continue to bear all through the season. It has the solid fruit and superior quality of the later kinds. Under some conditions Valiant is subject to cracking around the stem. Pkt. 30¢; ½ oz. 60¢; oz. 95¢; ¼ lb. \$2.75; lb. \$9.00.

450 GEM: 68 days. A heavy yielding second early variety. Plants are smaller more compact permitting closer planting—are easy to spray and pick. Fruits are large, with firm meaty interiors. Pkt. 30¢; ½ oz. 70¢; oz. \$1.05; ¼ lb. \$3.25; lb. \$10.00.

They are firm in texture and hold up well. Yields are high; ripens after Fairfax and Robinson. See prices below.

★FAIRFAX: One of the more popular older varieties ripening a few days earlier than Sparkle. It yields heavily when well grown in rich soil and the large firm conic shaped berries have an excellent flavor and sweetness. I am writing to you because I have never seen such nice strawberry plants. The Pocohontas are growing very well.

SAV-A-RO

PLANT PROTECTORS

SAV-A-RO protects seeded rows or seedlings in a garden from snow, frost, wind and cold, as well as from small animals and the many insects prone to devouring the first green sprouts of spring. When securely sealed all around, it retains warmth and moisture, speeds germination, increases the yield of seeds and stimulates plant growth.

Each SAV-A-RO consists of a 12 foot double sheet of transparent plastic and seven sturdy metal wickets. The wickets are threaded between seals at regular intervals along the sheets so that when pushed into the ground, they form a 12 foot, tunnel-like cold frame. Soil put on the plastic apron along the sides and at the ends protects the row from hazards of early spring. Ends open easily if ventilation is needed. SAV-A-RO can be re-used season after season. Box 12' long \$1.79.

LAWN GRASS

Seneca Lawn Mixtures

For New Lawns sow 1 lb. per 500 sq. ft.

ONLY OUR EXTRA FANCY GRADE SEED IS USED IN
SENECA LAWN MIXTURES

SENECA LAWN MIXTURE

The Best All-purpose Lawn Grass Mixture

For establishing a fine thick permanent lawn under average soil conditions we highly recommend our Seneca Lawn Mixture which is especially prepared from the highest quality grass seeds produced. It makes a smooth, green, velvety lawn with a thick bottom free from clumps. The mixture is composed of the following grasses (percentages are approximate): 75% Kentucky Blue Grass, 18% Illahee Creeping Fescue, 5% Red Top, 2% Wild White Clover.

Kentucky Blue Grass makes the thick basic turf; it responds to good fertility (likes a limestone soil or well-limed soil) and flourishes in spring and fall. Illahee Creeping Fescue is deep-rooted and thrives under adverse conditions including hot weather and poor, sandy soils. Wild White Clover blends well with the other grasses, stays green all summer and enriches the soil. 1/2 lb. 90¢; 1 lb. \$1.55; 5 lbs. \$7.25; 10 lbs. \$14.00; 20 lbs. \$27.00; 50 lbs. \$65.00, prepaid.

SENECA SHADY LAWN MIXTURE

Shady areas are a problem. Many times it is because of low fertility rather than shade that causes those bare spots in the lawn. Some trees are heavy feeders close to the surface. If there is adequate plant food in the soil our Shady Lawn Mixture makes a beautiful turf in the shady spots. Our mixture contains the following special grasses (percentages are approximate): 50% Illahee Fescue, 15% Kentucky Blue Grass, 25% Poa trivalis, 5% Colonial Bent, 5% Red Top. This combination provides grasses that will succeed in dry or moist locations in fairly deep shade or, moderately sunny spots. 1/2 lb. 90¢; 1 lb. \$1.55; 5 lbs. \$7.25; 10 lbs. \$14.00; 20 lbs. \$27.00; 50 lbs. \$65.00, prepaid.

ECONOMY GRASS MIXTURE

Annual Seeding

There are often places so heavily shaded that permanent grasses cannot be established. There may also be ground around new houses for instance where permanent lawns are desired but cannot be established at present because of the high cost of good lawn mixtures or because ground has not been permanently graded. For such conditions we suggest sowing this inexpensive mixture of quick growing grasses (45% Timothy, 40% Annual Rye Grass, 15% Perennial Rye Grass) it will cover the ground and remain green until late summer. Very heavily shaded areas will have to be fertilized and reseeded each year. 1 lb. 75¢; 5 lbs. \$3.25; 10 lbs. \$6.00; 20 lbs. \$11.00; prepaid.

WEEDEZ WONDER BAR

The Weedez Wonder Bar is formed of wax and impregnated with 2,4-D weed killer. You simply drag the bar across the lawn to be treated. Treats a lawn 100 feet wide by 200 feet deep, or smaller yards for several seasons. 22" Wonder Bar \$4.98 Prepaid.

NEW LAWN GRASS SEEDER

Ideal new quart size all-metal cyclone type grass seeder that will give you better lawns with less seed. Gives your lawn that "Professional" look. Price \$5.25.
